The Wescon 596 Series Microstop is the industry standard microstop countersink cage, the best choice for most work surfaces with straight-in access. Dual ball bearings rated to 10,000 rpm and a heavy duty thrust bearing carry the cutter load, an integrated dust seal keeps chips out of the mechanism, and a solid stop holds depth. Depth adjusts in 0.0005 in (0.013 mm) increments over 0.300 in (7.60 mm) of shaft travel on a 1/4 in shaft. Cutter threads are available in 1/4-28, M6x1 and M8x1. Choose from twelve skirt styles including straight, slotted, 2-leg, 3-leg, flanged, bell and internal or external thread, nylon, steel or phenolic feet, and round, tri-flat (TF), quick change (QC) or long threaded shank (TSL) shafts.
