Using SF bushings in a kit allows technicians to swap bushings quickly when stepping up hole sizes or swapping between different inner diameters.

The kit includes:
- **1x WES5723-2 egg cup drill bushing holder**: Anodized aluminum body for durability and wear resistance, and a heavy duty plastic footpiece that doesn't scratch the surface. Holds 1/2" diameter bushings up to 3/4" in length.
- **6x WESSF series SF bushings**: 1/2" outer diameter x 1/2" length. Inner diameters to guide the drill bit: 3/32", #40, #30, #21, #10, and 1/4".
