* The image represents the general look of the series. Actual product may vary based on options selected.

Threaded drill collets with 1/4-28 male thread and 120 degree seat for 1/4-28 threaded angle drills and pancake drill attachments. Hold round shank bits and cutters from #50 (0.070 in) to F (0.257 in). Custom sizes on request.

WES1605 threaded drill collets thread into a 1/4-28 threaded angle drill or pancake drill attachment and let it run standard round shank tools such as drill bits, reamers, countersink cutters and deburring cutters. The 120 degree seat matches the spindle of most aircraft angle drills, so the collet seats square and the tool runs true.

Fourteen stock sizes cover wire gauge, letter, fractional and decimal sizes from #50 (0.070 in) to F (0.257 in), including #40, #30, #20, #10, 3/16 in and 1/4 in. The 1/4 in collet, WES1605-2500, fits the many bits and cutters made with a 1/4 in shank. Pick the collet for the shank you run, thread it into the spindle, insert the shank and tighten the collet nut with a wrench. Custom sizes are available as an option on the product page. Made in USA.

SPECIFICATIONS

Mount Type	Male Thread
Chuck Type	Collet Chuck
Thread Size	1/4-28
Size	#50 (0.0700in)
Country of Origin	USA
