* The image represents the general look of the series. Actual product may vary based on options selected.

Standard series quick change drill chuck, 3/8-24 or 1/2-20 female thread, fits most drill motors. Takes WES1625 quick change collets for fast bit changes. Ridged or smooth cap, standard or extended length body.

The WES1750 quick change chuck mounts on a drill motor spindle with a 3/8-24 or 1/2-20 female thread and takes WES1625 quick change collets. A drill loaded in a collet goes in and out of the chuck without a chuck key, so changing from drill to reamer to countersink is a pull and a push.

Ridged or smooth cap, in a standard or extended length body. Quick change is the standard system on many Boeing programs, and Wescon microstops and other 1/4-28 tooling are offered with a matching QC shaft. Made in USA.

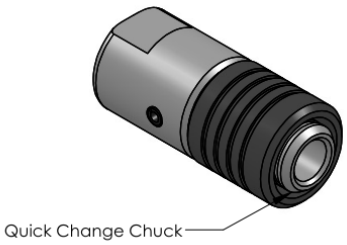

SPECIFICATIONS

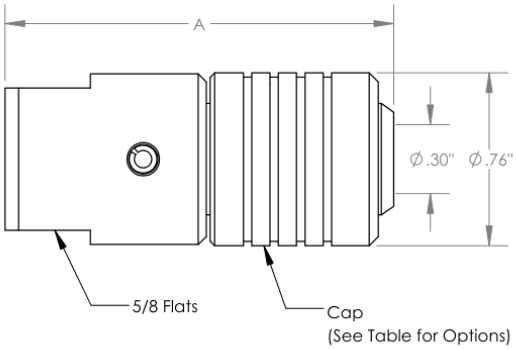

Mount Type	Female Thread
Chuck Type	Quick Change
Thread Size	3/8-24
Cap Type	Smooth Cap
Country of Origin	USA
