* The image represents the general look of the series. Actual product may vary based on options selected.

A swivel head drill bar keeps the bushing square to the surface when the hole is on a curved skin or the bar cannot sit flat. The Wescon WES5802 adds an up-down swivel head to the WES5800 for 1/2 inch or 3/4 inch OD SF bushings, so the drill follows the hole axis instead of the bar. Use it over misaligned holes on contoured panels, near a flange, or where the bar has to clamp to a different plane than the hole. Anodized aluminum snatch block, also called a steam boat, made in USA.

SPECIFICATIONS

Bushing Size	3/4 in
Bushing Type	SF Drill Bushing
Bushing Length	1/2 in
Country of Origin	USA
