* The image represents the general look of the series. Actual product may vary based on options selected.

Quick change spoon style handle for slip/fixed renewable SF drill bushings, giving the operator a firm, comfortable grip while holding the bushing square to the work surface. The 30 degree head offset keeps your hand clear of the drill motor and improves visibility in tight airframe structures. Machined from anodized aluminum for wear resistance and light weight, with the lock screw included so bushings can be swapped without additional tooling. Made in the USA.

SPECIFICATIONS

Drill Bushing Size	5/16"
