The WESKIT005 combines two WES5722 threaded egg cup drill guides, one with a plastic foot and one with an aluminum foot, a WES5622 mini guide with WES5632 handle, and nine 1/2"-13 WES5502 bushings from #40 to F. Suitable for drilling on aerostructures.

The **WESKIT005 Threaded Drill Guide and Bushing Kit** is a 13-piece set with two egg cup guides, a mini guide with handle, and nine threaded bushings. It is designed for aerospace technicians who need a hand-held drill guide that holds 90-degree accuracy on flat and contoured surfaces. By utilizing a 1/2"-13 threaded interface, the kit provides a secure, zero-play connection between the housing and the hardened steel bushings.

Complete Range: Nine bushings, from #40 (.0980") for pilot holes to size F (.2570") for final sizing.
Surface-Specific Protection: Use the plastic-foot guide on composite panels and the aluminum-foot guide on heavier airframe structure.
Wescon Durability: Made in the USA for continuous assembly line use.
