WESKITBOX1	Wescon Kit Case, Type 1	1

16 SF drill bushings, from 3/32 in (0.0938 in) to 5/16 in, with 3 anodized aluminum body egg-cup drill guides with 3-leg heavy-duty plastic footpiece, and a drill bar. Preferred hole repair kit. Made in USA.

The **WESKIT013 Hole Repair and Resizing Kit (SF Bushing)** is made for repairing misaligned drill holes using SF bushings and their holders. The kit includes multiple SF bushing holders, so a technician can have different bushings set up at the same time to pull a hole i.e. fixing it.

SF bushings are used in this hole reparing kit since it lets technicians swap bushings quickly when stepping up hole sizes.

The kit includes:
- **3x WES5723 egg cup drill bushing holders**: Anodized aluminum body for durability and wear resistance, and a heavy duty plastic footpiece that doesn't scratch the surface when in contact. Holds 1/2" diameter bushings.
- **1x WES5800-1 adjustable drill bar (snatch block)**: Also made from anodized aluminum. It clamps to the surface with temporary fasteners and anchors the bushing over the correct location, so you can pull a misdrilled hole and repair it.
- **16x WESSF series SF bushings**: 1/2" outer diameter x 1/2" length, with inner diameter ranging between 3/32" and 5/16"; these bushings are interchangeabe between bushing holders included in the kit.

Made in USA
