2x WES5722 1/2-13 threaded egg cup drill bushing holder
1x WES5622 1/2-13 threaded mini egg cup drill bushing holder
1x WES5632 handle for WES5622
10x WES5502 1/2"-13 threaded drill bushings

The **WESKIT014 Threaded Bushings drill guide kit** comes with 2 threaded "egg cup" style drill bushing holder, 1 "mini" drill bushing holder for tight space application along with an aluminum handle for improving grip on the mini holder; 10 units threaded bushings included in this kit. This kit of guides and bushing allow a technician to have multiple bushing sizes set up and ready to use for perpendicular hole making works.

The WES5722 (Egg cup) and WES5622 (Mini egg cup) have anodized aluminum body which provides increased durability and wear resistance, while the heavy-duty plastic footpiece allows to protect surface from scratching on contact. Wescon 5502 1/2"-13 Threaded Drill Bushings are constructed from hardened steel to ensure durability and precision in guiding drills.

One Bushing Set, Multiple Tools: The kit uses 1/2-13 threaded bushings throughout, all bushings are interchangeable between egg cup and mini drill bushing holders.

Threaded bushings: Bushing and holder can be held in any orientation without the risk of loosening or falling out.

Standard hex socket bushings: The unique 5/16" hex socket head design facilitates easy installation and removal with a standard Allen wrench.

Surface Protection: Heavy duty plastic footpieces help prevent tooling marks on finished skins.
