1x WES596 microstop with Nylon footpiece (5/8" cutter capacity)
2x W415 cutters with 1/2" body, 100°, HSS, and 1/4"-28 thread
Pilot Size: 4.8 mm (3/16"), 6.35 mm (1/4 in)

The **WESKIT017 Collision Repair Countersinking Kit** is made for auto body workshops that perform structural/ collision repairs, specifically on Tesla vehicles. This kit allows a technician to countersink holes in aluminum structures - ensuring that the OEM approved countersunk rivets sit flush to the surface.

This kit includes:
- **1x WES596 high speed, heavy duty microstop**: 5/8" cutter capacity, with a nylon footpiece that protects worksurfaces from marring or scratches when in contact. The unit has a standard 1/4"-28 thread.
- **2x W415 high-speed steel (HSS) cutters**: 100° cutting angle, 1/2" body diameter, and a 1/4"-28 thread that fits in the WES596 microstop. Pilot sizes available are: 4.8 mm (3/16"), 6.35 mm (1/4 in)

Made in USA

Note: Our kit has same size cutters and suitable microstop as drop-in replacement for Tesla P/N: *1133101-00-A* (Refer to Tesla's "Model Y Collision Repair Procedures Manual")
