WESKITBOX1	Wescon Kit Case, Type 1	1

1x WES596-ER extended reach microstop with skirt length 2.75" and 3/8" cutter capacity
5x W415 series HSS countersink cutters with 3/8" body diameter, 100°, 3-flutes, 1/4"-28, Pilot sizes: #40, #30, #21, #10, 1/4"

The **WESKIT020 Extended Reach Microstop Kit** is made for technicians who need to countersink in restricted access areas, such as deep channels or junctions where there is too little clearance for a standard microstop or drill motor.

The kit consists of a single **WES596-ER** microstop with a 2.75" long nose/ skirt and has a 3/8" cutter capacity. The **W415 series** cutters included in the kit fits into the microstop, the specs are 3/8" body diameter, 100° cutting angle, 3-flutes, 1/4"-28 threaded, with variable pilot sizes: #40, #30, #21, #10, 1/4"

Extended reach: The WES596-ER reaches deeper into tight areas of an airframe.
Deep channels: Use it where a WES396 can't reach, such as aircraft seat tracks with deeper channels.
Made in USA
